SUMMARY

Full Stack Developer with production experience building and deploying web applications, REST APIs, e-commerce platforms, and automation systems. Processed live payments across 2 gateways (Stripe, Instamojo), engineered AI data pipelines with Python and NLP, and shipped content automation reaching 700K+ monthly organic reach. Proficient in React, Next.js, Node.js, Express, TypeScript, Python, PostgreSQL, and MongoDB with hands-on experience in agile development, CI/CD, Docker, and cloud deployment.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: React 19, Next.js 15, SvelteKit, Svelte 5, Tailwind CSS, DaisyUI, Framer Motion, Responsive Web Design, Vite

Backend: Node.js, Express 5, Fastify 5, Flask, REST API Development, WebSocket, Socket.IO, Microservices

AI / ML: TensorFlow, Hugging Face Transformers (BART), SpaCy, VADER, Groq LLM, Natural Language Processing (NLP)

Databases: PostgreSQL, MongoDB, SQLite, Prisma ORM, Firebase, Database Design

Tools & DevOps: Git, GitHub, Docker, CI/CD Pipelines, Unit Testing, Vitest, Vercel, Render, Puppeteer, Stripe, SendGrid, Zod, pnpm

EXPERIENCE

Full Stack Developer | *Bhairav Aaradhyaa* | [Live Site](#) April 2025 - Present

- Architected and deployed a full stack web application using React 19, Express 5, PostgreSQL, Prisma ORM, and Firebase Auth with end-to-end user authentication and session management
- Integrated dual payment gateway processing with Stripe (international) and Instamojo (India), implementing webhook verification, error handling, and unified order tracking
- Automated SEO with a Puppeteer pre-rendering pipeline that generates static HTML for 192 routes, improving search engine indexing from zero to full page coverage
- Built a content automation pipeline producing 3,500+ social media assets across 4 platforms with Brevo email delivery, driving 700K+ monthly organic reach

Web Developer | *UWEAR UK* | [Live Site](#) September 2024 - Present

- Developed a React 18 e-commerce storefront with product catalog, shopping cart, checkout flow, and order management system backed by MongoDB and Express
- Created an admin dashboard featuring Chart.js data visualisation, sales analytics, inventory management, and order processing workflows
- Implemented Stripe payment integration, SendGrid transactional emails, and JSON Web Token (JWT) authentication with role-based access control (RBAC)

IT Work Placement | *KPMG* March 2024 - April 2024

- Completed 4-week IT placement covering business analysis, requirements gathering, and technical problem solving alongside senior consultants

Team Supervisor | *SPAR* September 2023 - Present

- Supervised customer service operations handling 100+ daily interactions, achieving 95% first-contact resolution through effective communication and problem solving

PROJECTS

AI Model Evaluation & Benchmarking | *Python, Pytest, Rubric Design, RLHF, LLM Evaluation*

- Authored evaluation rubrics and Python (pytest) verification suites to assess large language model and multi-turn AI agent trajectories against weighted, criteria-based scoring, sustaining a 4.29/5.00 QA quality rating (65% Exceptional) across 17 audited reviews - over 2x the required target
- Performed blind pairwise (ELO) model ranking and failure-mode analysis across text, audio, and multimodal outputs, flagging hallucinations, safety and escalation issues, and edge-case regressions to improve model reliability

GeoThreadBot | *Python, Flask, TensorFlow, Hugging Face BART, SpaCy, VADER, NLP*

- Engineered a 7-stage AI data pipeline fetching from 3 API sources (Twitter, YouTube, RSS), performing language detection across 12+ languages, relevance scoring with NLP, BART summarisation, fact cross-verification, and automated publishing to Twitter
- Refactored from monolithic prototype into modular Python package architecture with 25 modules across 8 packages and 19 unit tests

CyberShip Carrier Service | *TypeScript, Zod, Vitest, UPS OAuth 2.0*

- Designed a carrier-agnostic shipping rate aggregator using Adapter design pattern to normalise 3+ carrier APIs (including UPS OAuth 2.0) behind a unified interface
- Implemented type-safe request/response schemas with Zod validation and achieved 100% test coverage using Vitest

EDUCATION

BSc (Hons) Computer Science

April 2022 - July 2024

University Academy 92 (Lancaster University), Manchester, UK | GPA: 3.5 / 4.0
